Having worked within the Financial Services Industry for over 20 years, I have a proven track record of developing, launching and managing successful products. This includes taking ideas from conception, through the design and development phases, to negotiating and contracting with clients for ultimate delivery.

I work closely with clients and have managed mutually beneficial and successful business units within a custodian, an investment bank and a vendor organisation. These units covered areas as diverse as OTC clearing, listed derivative clearing, KYC/AML case management, legal document remediation and client onboarding.

Outside of the above, I also work with a number of technology start-ups, specifically covering legal technology offerings.
