📞 LOCATIONS

[Italy](#)

I advise clients on all corporate and M&A activities - particularly in the energy sector. As well as providing legal advice in numerous operations relating to initiatives for producing energy from renewable sources, I have worked with AEEGSI to implement an experimental project to simplify the regulation of the functional separation of distribution activity within vertically integrated enterprises.

Over the years I have represented numerous Italian industrial entities, including many listed on the Stock Exchange, investment funds and other investors, as well as major multinationals in matters of contractual and corporate nature, particularly in M&A operations.

I am a member of Supervisory Bodies and Control Bodies and independent director for major Italian and international industrial entities.

I am a speaker at various conventions and the author of articles for specialist journals and economic newspapers.

I advise my clients in Italian and English.
