Particularly due to my own long-term executive experience, which includes my membership in a TecDAX Supervisory Board, I am rendering advice at the highest quality standard and with the necessary sense of judgement in full awareness of the practical challenges executives may face. This includes my special expertise on board counseling and legal coaching, which serve the immediate prevention of executive liability.

My expertise is focused on the ongoing legal advice to listed and non-listed companies, its management and supervisory or advisory board members as well as the legal advice on transactions of German and international clients regarding Mergers & Acquisitions, Private Equity & Venture Capital and Corporate Finance. This particularly includes public takeovers in the regulated and non-regulated market, the preparation and execution of shareholders' meetings as well as supervisory board or advisory board meetings, the advice on risk matters, specifically with respect to corporate and capital markets compliance, the settlement of shareholder disputes as well as liability and corporate litigation proceedings. I am also rendering advice to larger companies and companies in the German Mittelstand with respect to German and cross-border transactions, including mergers, Joint Ventures and corporate restructurings.

I am one of the experts of Directors' Channel and provide an online seminar at the Directors Academy for the rights and duties of Supervisory Board members.

Following my belief in dedicated teamwork, I founded the Corporate Capital Markets (CCM) Group at Fieldfisher Germany and initiated the Risk Advisory consulting to which I also contribute my work and experience as risk partner of Fieldfisher. My international experience includes Europe and the US and particularly Japan, where I worked for two years for an international law firm.
