My experience in structured finance includes assistance to arrangers and originators in securitisations and trade receivables financing transactions and assistance to sellers and investors in principal finance transactions of performing and non-performing loans. I assist clients on Italian aspects of derivatives, repos, securities lending, margin loans and in general in structured finance transactions with underlying assets of any kind (including equity).

I also deal with digitalization of finance transactions, assisting digital platforms for trading of financial assets and supporting investors in transactions involving virtual currencies.

I am used to lead and guide clients on their "first time" transactions in Italy and provide guidance on proper structuring having regards to the peculiarities of the Italian legal, regulatory and tax framework.

I am qualified in Italy to represent client before the Supreme Court (Cassazionista) and am also qualified as solicitor admitted in England and Wales. I have practiced in London for six years in English and Italian firms.
