I am a clinical negligence lawyer and have had many years' experience dealing, predominantly with serious injury and fatal injury claims. These include brain injury, birth injury, spinal injury, cerebral palsy and death of a loved one.

Over the years I have managed, with my team, to secure high, sometimes groundbreaking, awards for clients and their families.

I enjoy Working as a team with the client and carefully selected experts. Over the years I have worked with people from all walks of life with all sorts of serious and life changing injuries. I'm often called upon to advise and highly distressing circumstances and I'm keen to ensure that the litigation and legal process delivers the right solution for every client.

Wherever possible I try to ensure a collaborative and creative approach which, hopefully delivers a fair and speedy result for my clients.

I am also keen to ensure that the medical profession are given proper education about the legal process and have worked with various medical organisations to deliver training and ensure that the Law can be used as a tool for important patient safety lessons to be learned.
