My clients vary from national and international businesses such as insurance companies, financial institutions and public economic bodies operating in various commodity and industrial sectors.

I have gained considerable experience in the field of contract law, corporate reorganisations, debt restructuring of companies in crisis, and arbitration. I have acquired strong expertise with regard to specific regulatory requirements, also linked to special laws and regulations (Consob/Stock Exchange - corporate social responsibility - Law 231/01 - insurance law).

I have participated in listing operations and capital increases of listed companies and have contributed to drafting the Code of Ethics and Anti-Corruption Code. I have worked with control, risks, and remuneration committees, as well as with Boards of Auditors, Internal Auditors and Compliance Committees, for the purpose of constructing, implementing, updating and integrating the internal control system and internal operating procedures.

I obtained my professional qualification in 1992 and the qualification to practise before the higher courts in 2006.

I am strongly involved in training. I am a member of the Mentoring Program at the Libera Università degli Studi Sociali - LUISS Guido Carli and I take part in numerous conferences and training courses, mainly on corporate matters.

I was a member of the Training and Credits Internal Commission of the Bar

Association of Rome and, at the latter, am now a member of the team dedicated to the company law project.

I advise my clients in Italian and English.
