I advise clients on all aspects of the project lifecycle, from development and the equity and debt financing of, through to the acquisition and disposal of interests in, energy and infrastructure projects.

I have a particular focus acting for investment funds on corporate mergers and acquisitions in the energy and infrastructure sector.

I have recently advised a global investment management business on its bid for a 550MW portfolio of wind-farms; an infrastructure fund on the establishment of its solar energy investment platform; Bioenergy Infrastructure Group on its acquisition of 20 AD and biomass EfW assets from the Green Investment Bank; and an investment fund on its disposal of Northern Ireland's largest AD facility.
