I provide commercial and contractual advice to companies related to the pharmaceutical, cosmetics, and food sector. I have experience in the drafting of documents and agreements (license, supply, distribution, clinical trials, etc). I advise in relation to regulatory law in the field of compliance, promotion of medicines, health equipment, cosmetics and food supplements, as well as in the field of compliance with sectorial codes of conduct and policies of compliance.

Prior to my incorporation to the Life Science Department, I worked at the Litigation and IP Department, where I was in charge of management of contentious proceedings before Ordinary Courts, and agreements involving IP rights (patents, designs, trademarks and copyright).
